

FUNDACIÓN NOELIA

NIÑOS CONTRA LA  
DISTROFIA MUSCULAR CONGÉNITA  
POR DÉFICIT DE COLÁGENO VI

Dear Dr. Walter Koroshetz

From the Noelia Foundation, we would want to give our support for the team of researchers from NIH / NINDS led by Dr. Carsten Bonnemann with their project "Development of Selective Silencing Mutation as a Therapy for the Collagen VI Related Dystrophies"

In this sense, we agreed to deliver \$ 75,000 for the first year of the project mentioned before, provided the following terms:

- The Dominant Glycine mutations should be included in the research in addition to the dominant exon skipping mutations.
- Our Foundation should be informed of the progress with periodic reports of the results at least every 4 months.
- Any significant changes in the project also must be properly communicated.

Serve this letter as an agreement between both parts.

Yours sincerely,

President of Fundacion Noelia

Director of the NIH / NINDS

Canela Noelia Vives

Walter J. Koroshetz, M.D.
